PRESS RELEASE Mars 27th, 2013

Sanuvoy offers an all new cost-effective Premium In-Duct UV Air Treatment System

(Montreal, Canada) – On April 15th, 2013 Sanuvoy Technologies Inc. will be releasing the all new cost-effective SR+ In-Duct UV Air Treatment System designed to treat residential applications up to 2,000 sq.ft.

Homeowners and builders are forced to seal their homes to save energy and resources by not having to re-heat and re-cool the air. A major disadvantage to this is not being able to bring in enough fresh outside air to lower the concentrations of contaminants within the home. The Sanuvoy SR+ UV system is the ideal solution to compliment a home's filtration system by addressing the thousands of biological & chemical contaminants that pass through even the highest efficiency filter.

According to Aaron Engel, Sanuvoy Vice-President Marketing, "We have seen stellar growth with our premium R+ UV Air Treatment System over the last few years; the R+ was almost 20 years in the making bringing innovative features such as improved efficiency, installation, ease of troubleshooting and maintenance to market. From our perspective, we were missing an entry level unit with the same premium features." Aaron Engel goes onto say "The SR+ brings many of the features that made the R+ so innovative but at a more affordable price point for those installers who service smaller homes up to 2,000 sq.ft."

The SR+ employs Sanuvoy's proprietary UV process to effectively destroy airborne viruses, bacteria, mold, chemicals, VOCs and odors that continually circulate within the home's HVAC system and building in concentration within the home's envelope. Installation requires approximately 20 minutes as the unit is plug-and-play and relies on a microprocessor controlled sensor for automatic operation.

The SR+ will be readily available at leading HVAC Wholesalers across the United States and Canada beginning April 15th 2013.

About Sanuvoy Technologies:

Sanuvoy Technologies Inc. is a global leader in ultraviolet air treatment providing advanced in-duct & stand-alone UV air and surface sterilization systems. Sanuvoy manufactures UV Systems for residential, commercial, industrial, medical & military applications. Sanuvoy UV Systems have been tested by government agencies, laboratories and universities. These include RTI, US EPA and National Homeland Security, Penn State University and McGill University. For more information contact Solange Webb at 1-888-726-8869 or email at SWebb@sanuvoy.com.
