## SABER PRO

Cooling coil purification  
UV object sterilization system

The proprietary Sanuvox Saber Pro 24V UV Object Purifier is designed to bask the evaporator coil with UVC Germicidal Energy, preventing and destroying mold, biological odors and other microbial contaminants.

A coil with bio-film (a coating of microbial growth) acts as an adhesive, attracting dirt and coating the fins of the coil. This typically results in an odor emanating from the equipment and a loss in energy efficiency as the equipment must work harder to provide the same air temperature. The Saber Pro operates on 24 volts.

## SABER PW 16/24 GM2 FEATURES

- UVC Germicidal Coil Cleaner destroys mold & their associated odors on the coil
- Improve energy efficiency
- 3" Wireless LCD Display provides important user information up to 60 ft away
- 16 inches UVC T5 lamp
- Magnetic bracket or duct installed
- Warranty (parts only)
  - 1 year on lamp
  - 5 years on ballast
- Optional step down transformer (120v to 24v)
- ETL certified
