## SABER MAGNET Coil Cleaner

The Saber Magnet 24V 16" is a coil cleaner using UV energy. The coil cleaner is designed to prevent and destroy bio-chemical contaminants. A coil with bio-film (a coating of microbial growth) acts as an adhesive, attracting dirt and coating the fins of the coil. This results in an odor emanating from the equipment and a loss in energy efficiency as the equipment must work harder to provide the same air temperature. The Saber Magnet improves indoor air quality and otherwise your health.

The Saber Magnet is supplied with a mounting bracket, which can be mounted to the side of the coil allowing the UV Lamp to be inserted in-between or over the coil. The unit comes equipped with a ballast and a UV lamp.

Low voltage 24VAC ballast w/ Lamp and Ballast Monitoring Electronics

Magnetic Multi-Bracket for various applications

## SABER 16/24-GM2 FEATURES

- UVC germicidal lamp
- Status LED on ballast
- 16 inches UVC T5 lamp
- Magnetic bracket or duct installed
- Warranty (parts only)
  - 1 year on lamp
  - 5 years on ballast
- Optional step down transformer (120v to 24v)
- ETL certified
