

A Breath of Fresh Air for the Whole Home

R MAX

Best in class UV Air Purifier and Odor Reduction System

The Sanuvov R Max represents an evolution in UV for whole home air purification. The high-efficiency patented design helps reduce airborne bio-chemical contaminants, while providing important user information on the 3" Back-Lit LCD display.

Installed into the return or supply plenum, the Sanuvov proprietary process maximizes dwell (contact) time between the air and UV energy.

With the ability to purify homes up to 4,000 sq.ft., the patented technology rapidly purifies the air and helps reduce odors within the home.

BENEFITS ✓

Most advanced purification system available

- Helps protect from airborne germs
- Helps reduce common household odors
- Helps alleviate allergies and flu symptoms
- Helps control asthma symptoms
- Sleep better

FEATURES ✓

- Patented process including High-Intensity 19 mm Quartz UV 'J' Lamp, enhanced by cobalt catalyst
- UV Chamber rotates 360° for up-flow or down-flow systems
- 3" LCD display provides important user information

WARRANTY ✓

- Lamp: 3 years
- Ballast: 3 years

- 1 Contaminated air enters the UV air purifier parallel to the UV 'J' lamp, thus increasing contact time with the UV energy.
- 2 The turbulator forces the air to spin and mix around the UV 'J' lamp.
- 3 The first section of the UV lamp, enhanced by the cobalt catalyst, breaks up odor molecules and volatile organic compounds to render them inactive.
- 4 Then, the second section of the UV lamp takes care of the bio-contaminants in a similar way.
- 5 The aluminum reflector chamber directs the UV energy for optimal purification.
- 6 Finally, clean air circulates throughout the home.

UV 'J' Lamp

Installation: In-duct

Helps reduce odors and chemical contaminants

Helps reduce germs

Helps reduce volatile organic compounds (VOCs)

Purifies up to: 4,000 sq.ft.
