

Automatically Disinfecting Patient Bathrooms

ASEPT.1X MAX

24/7 Automated Protection Unit Against Pathogens

The ASEPT.1X Max unit pushes the limits of surface disinfection by automatically disinfecting patient bathrooms, which are a well-known reservoir of nosocomial diseases in hospitals.

Completely automated, the ASEPT.1X Max unit includes the following safety features: infrared motion sensors (PIR) and magnetic door detector set. This allows the unit to only operate when no one is in the patient bathroom, for 5-minute disinfection cycles after each use.

ASEPT.1X Max disinfects 99.99% of contaminants such as VRE, C.difficile, MRSA and Influenza A Virus by sterilizing the most commonly touched areas.

BENEFITS

- Fully automated disinfection for patient bathrooms
- Less than 5-minute disinfection cycle after each patient bathroom use
- Destroys pathogens responsible for nosocomial diseases
- Eliminates 99.99% of nosocomial pathogens

FEATURES

- Ceiling or wall-mounted
- Infrared motion sensors (PIR)
- Magnetic door detector set
- Unit dimensions : 42.4" x 13.5" x 4.6"

WARRANTY

- Lamps: 1 year
- Ballast: 3 years

Lamps length :
40"

Installation :
Stand-alone
(ceiling or wall-mounted)

Eliminates germs
