

Automated Mobile UV Disinfection Units

ASEPT.2X

Mobile UV Sterilization System

The ASEPT.2X system uses two units to disinfect an operating theater or a patient room, thus minimizing shadow areas left by conventional sterilizers.

These units can perform the disinfection task in less than 5 minutes. No other UV system can disinfect rooms as quickly and efficiently!

BENEFITS

- Automated disinfection with minimal human intervention
- Simultaneous operation of two units for quicker disinfection (In the U.S. : Single unit installation only.)
- 99.99% disinfection in 5 minutes

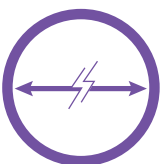

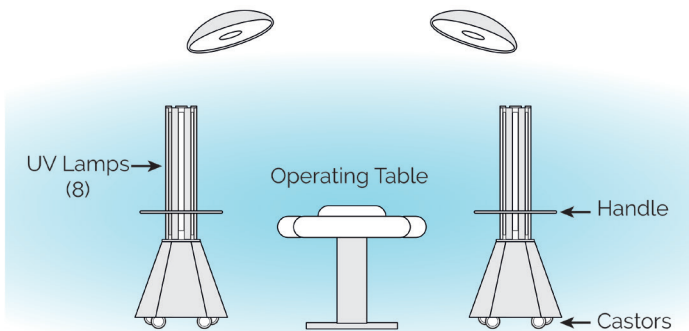

FEATURES

Per unit:

- Aluminum construction and medical grade stainless steel
- Multiple infrared motion detectors
- Handle for easy maneuverability
- Scalable software with updates
- Chronological data collection
- Integrated WEB server

WARRANTY

- Lamps: 1 year
- Ballast: 5 years

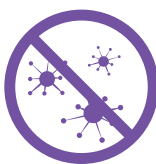

Lamps length:
40"

Portable

Eliminates odors
and chemical
contaminants

Eliminates germs
