

Breathe Better, Live Better

BIOPÜR

Most Advanced Purifier Available!

Designed to help reduce airborne viruses, bacteria, mold and germs, as well as chemicals and odors.

Using a state-of-the-art patented UV technology, this portable air purifier can clean up to 800 sq.ft.

The variable speed blower of the Biopür moves the air through a series of filters, then into the reflection chamber so that the air travels parallel to the UV lamp where a germicidal and oxidizing process attacks biological and chemical contaminants.

BENEFITS

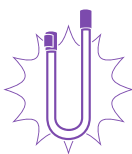

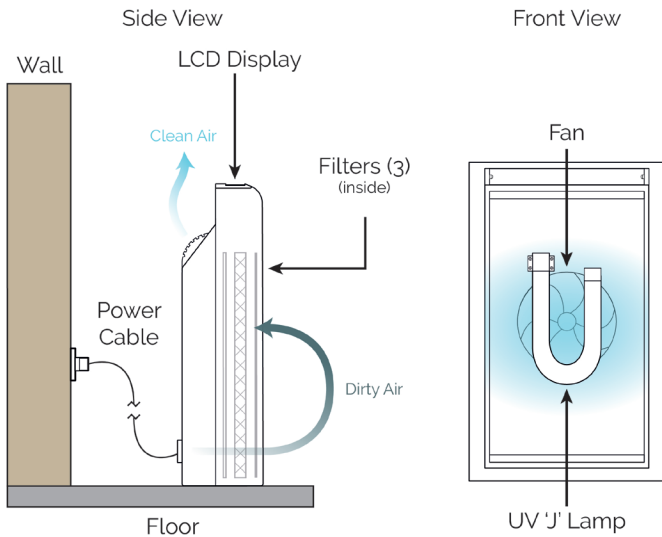

- Portable
- Protects from airborne germs
- Helps reduce common household odors
- Helps alleviate allergies and flu symptoms
- Helps control asthma
- Sleep better

FEATURES
