

Purifying Air & Eliminating Odors

QUATTRO

Air Purification Unit

Installed parallel to the airflow, the Quattro is a smaller version of the BioWall for air disinfection.

Installing a Quattro in the ventilation duct allows maximum disinfection thanks to a prolonged exposure of the bio-contaminants to high-power UVC.

BENEFITS

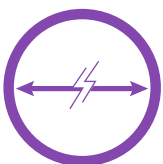

- Completes the work of filters
- Avoids high pressure losses
- Ensures continuous air quality
- Destroys up to 99.9999 % of the bio-contaminants

FEATURES

- Installed parallel to the air flow, the unit allows more contact time between the particles and the UV radiation
- Reflectors focus and maximize UV energy
- Flow meter included for unit control
- Outdoor LED indicating lamp status

WARRANTY

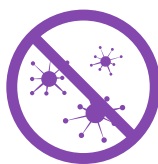

- Lamp: 1 year

Lamps length :
18"

Installation :
In-duct

Eliminates germs

Eliminates odors
and chemical
contaminants
