

For Pure & Smoke Free Air

**SANUVAIR® S300 VOC
Smoke Removal Unit**

Ideal for buildings where smoke and its associated odors can spread around, like smoking rooms, casinos and game rooms.

The Sanuvair® S300 VOC is designed to recirculate the air continuously in front of the UVC and UVV lamps, thus preventing bad odors and smoke to escape from the smoking area. The VOC controller will automatically trigger the UVV lamp, reacting to smoke concentration until it clears off.

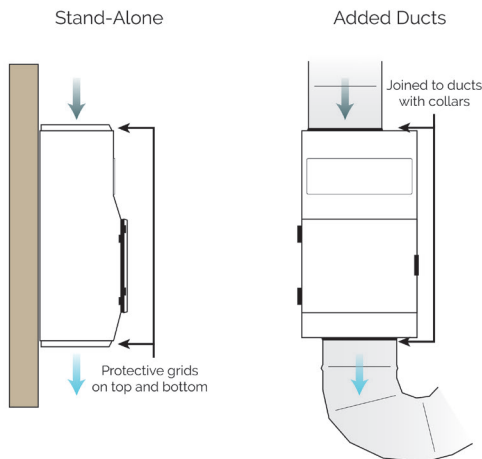

The process is done in 3 steps. First, bacteria, viruses and mold are sterilized by germicidal UVC in the aluminum reaction chamber. Second, odors and chemicals are treated by UVV photo-oxidation. Third, a pleated prefilter MERV 8 protects the blower.

Sterilized and filtered quality air is then distributed throughout the room.

VOC Controller

Installation (2 options)

Versatile unit that can be positioned horizontally or vertically

BENEFITS

UVC and UVV purification unit for an effective solution against smoke

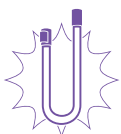

- Eliminates smoke and bad odors
- Improves air quality
- Purifies from 200 to 300 cubic feet per minute

FEATURES

- 2 patented 'J' Lamps, one of which is a full UVV lamp
- VOC controller
- 2" pre-filter
- 2-speed blower, 220 / 300 cfm
- High output ballast

WARRANTY

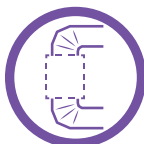

- Lamps: 2 years
- Ballast: 3 years

UV 'J' Lamp

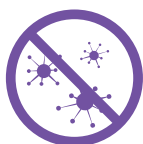

Installation : Stand-alone

Installation : Added ducts

Eliminates odors and chemical contaminants

Eliminates germs

Eliminates volatile organic compounds (VOCs)

Purifies up to : 3,000 cu.ft.
