

Destroying Odors for Cleaner Air

SANUVAIR® S1000 OZD

Odor removal Unit

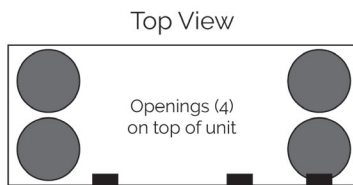

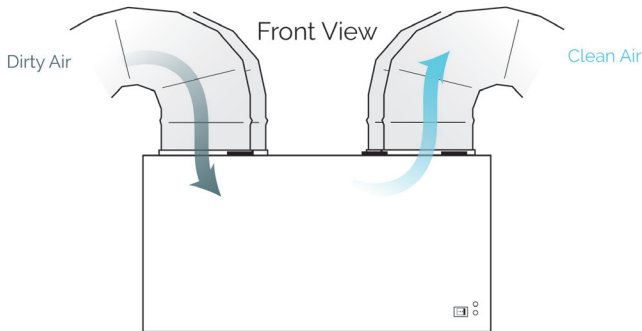

Ideal for buildings that often struggle with strong and lingering odors, such as garbage rooms, sports rooms, etc.

The Sanuvair® S1000 OZD is designed to recirculate the air continuously in front of a combination of filters, UVV oxidizing and UVC germicidal lamps. This prevents the proliferation of harmful bacteria and neutralizes bad odors emanating from garbage putrefaction. The hydroxyl controller will automatically react to a concentration of 0.025 ppm.

Sterilized and filtered quality air is then distributed throughout the room.

Hydroxyl Controller

BENEFITS

UVC and UVV purification unit for an effective solution against odors

- Eliminates strong and lingering odors
- Improves air quality
- Purifies 992 cubic feet per minute

FEATURES

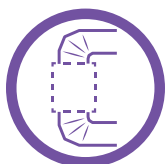

- 2 patented 'J' lamps, one of which is a full UVV lamp
- Hydroxyl controller
- Two pleated 1" pre-filters
- One 4" 95% ASHRAE filter
- High output ballast

WARRANTY

- Lamps: 2 years
- Ballast: 3 years

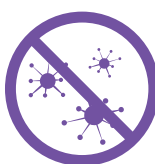

UV 'J' Lamp

Installation : Added ducts

Eliminates odors and chemical contaminants

Eliminates germs

Eliminates volatile organic compounds (VOCs)

Purifies up to: 10,000 cu.ft.
