

Fighting Smoke for Cleaner Air

SANUVAIR® S1000 VOC Smoke Removal Unit

Ideal for bars, smoking rooms, casinos, game rooms, cannabis smoke shops, and cigar rooms, where a reduction of smoke is required or recommended.

The Sanuvair® S1000 VOC is a larger version of Sanuvair® S300 VOC, and is also designed to reduce smoke build up by continuously pulling air through a UV chamber for photo-oxidation. The controller automatically cycles a secondary lamp on and off to actively treat the build up or reduction of smoke.

BENEFITS

UV purification unit for an effective solution against smoke

- Eliminates smoke and bad odors
- Improves air quality
- Purifies 992 cubic feet per minute

FEATURES

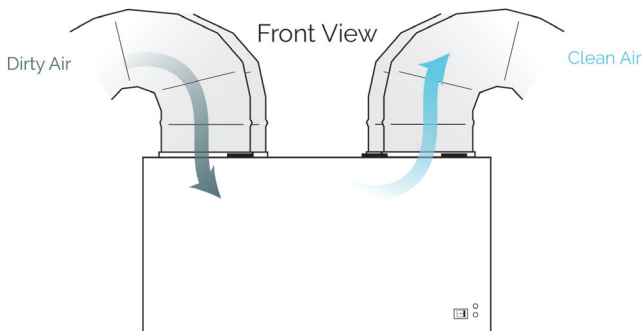

- 2 patented 'J' lamps, one of which is a full UVV
- VOC controller
- Two 1" pre-filters
- One 4" filter
- High output ballast
- Unit dimensions: 40" x 20" x 40"

WARRANTY

- Lamps: 2 years
- Ballast: 3 years
