

**Fighting Smoke for Cleaner Air**

**SANUVAIR® S1000 VOC  
Smoke Removal Unit**

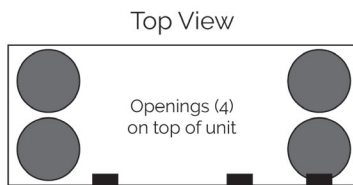

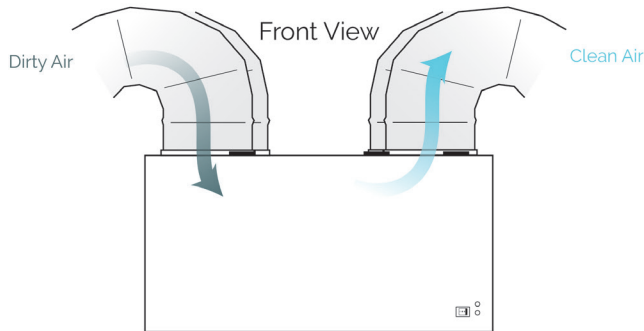

Ideal for buildings where smoke and its associated odors spread around, like smoking rooms, casinos and game rooms.

The Sanuvair® S1000 VOC is designed to recirculate the air continuously in front of a combination of filters, UVV oxidizing and UVC germicidal lamps. This prevents bad odors and smoke to escape from the smoking area. The VOC controller will automatically trigger the UVV lamp, reacting to smoke concentration unit it clears off.

Sterilized and filtered quality air is then distributed throughout the room.

VOC Controller

**BENEFITS**

**UVC and UVV purification unit for an effective solution against smoke**

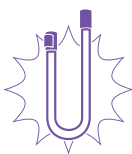

- Eliminates smoke and bad odors
- Improves air quality
- Purifies 992 cubic feet per minute

**FEATURES**

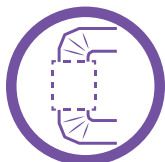

- 2 patented 'J' lamps, one of which is a full UVV lamp
- VOC controller
- Two pleated 1" pre-filters
- One 4" 95% ASHRAE filter
- High output ballast

**WARRANTY**

- Lamps: 2 years
- Ballast: 3 years

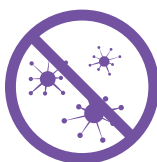

UV 'J' Lamp

Installation :  
Added ducts

Eliminates odors  
and chemical  
contaminants

Eliminates germs

Eliminates volatile  
organic compounds  
(VOCs)

Purifies up to:  
10,000 cu.ft.
